## **DETAILED ACTION**

## Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/14/2006 has been entered.

## Allowable Subject Matter

2. Claims 1, 2, 4, 6-8, 10-15, 17, 19-21, 23-26, 34, 36-38, and 40-49 are allowed.

Regarding Claims 1, 14, and 34, Mohindra, Mo, Kossor, Wright, and Mahowald do not teach, alone nor in combination, the digital compensation modules including a digital direct current (DC) offset compensation module having two signal inputs including an in-phase (I) signal component and a quadrature (Q) signal component, the analog radio transmitter includes a modulator prone to a carrier leakage deficiency, a minimum detected power reading associated with each of the signal inputs is determined, first and second DC offset compensation values are determined by interpolating the minimum detected power readings, and the digital DC offset compensation module is configured to eliminate carrier leakage associated with the modulator by adjusting the respective DC levels of the two signal inputs based on the first and second DC offset compensation values.

Art Unit: 2618

Regarding Claims 44, 46, and 48, Mohindra, Mo, Kossor, Wright, and Mahowald do not teach, alone nor in combination, a digital direct current (DC) offset compensation module having two signal inputs including an in-phase (I) signal component and a quadrature (Q) signal component, wherein a minimum detected power reading associated with each of the signal inputs is determined, first and second DC offset compensation values are determined by interpolating the minimum detected power readings, and the digital DC offset compensation module is configured to eliminate carrier leakage associated with the modulator by adjusting the respective DC levels of the two signal inputs based on the first and second DC offset compensation values.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eugene Yun whose telephone number is (571) 272-7860. The examiner can normally be reached on 9:00am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew D. Anderson can be reached on (571)272-4177. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
